Summary

Aspiring Data Analyst skilled in SQL, Python, Power BI, Excel, and Tableau, with hands-on experience across three data analytics internships and machine learning projects. Comfortable turning raw datasets into clear, actionable insights.

Experience

Prodigy Infotech

Data Analyst Intern

Cleaned and preprocessed multiple real-world datasets to prepare them for analysis. Transformed raw data to meet varying analytical requirements and built bar, line, and pie chart visualizations to communicate findings clearly to stakeholders.

Oasis Infobyte

Data Analyst Intern

Collected and preprocessed business datasets, then applied data analysis and visualization techniques to surface actionable insights. Strengthened skills in business data interpretation and analytical problem-solving.

Hyundai Motor Private Limited

Data Analyst Intern

Analyzed operational data to identify patterns supporting data-driven decision-making, contributing to a strong foundation in translating raw data into business-relevant insights.

Projects Done

Sentiment Analysis | *Python, Machine Learning, Sklearn*

Designed a sentiment classification system to categorize product reviews into positive, negative, and neutral classes. Converted textual data into numerical features using TF-IDF vectorization. Worked with real-world e-commerce review datasets (Amazon/Flipkart) to analyze customer feedback.

Brain Tumor Detection | *Google Colab, VS Code, Python, Flask*

Developed a CNN-based deep learning model using EfficientNetV2 to detect the presence of brain tumors from MRI images. Built a web-based interface using Flask, developed and managed in VS Code, for MRI image upload and prediction display.

Anomaly Detection in robot using the Current Sensor Data

Built an anomaly detection system for robots using current sensor data to identify abnormal behavior and potential faults. The solution helps improve operational reliability through real-time monitoring and predictive maintenance.

Achievements

Best Coordinator — SA-Hackathon '26

Served as Student Coordinator for a 36-hour national-level hackathon (in association with Hexaware) and was recognized as best coordinator.

Class Representative — 2 semesters

Represented classmates for two semesters, coordinating between students and faculty.

Cognizant Technoverse Hackathon 2026

Certificate of Appreciation for participation, Cognizant.

Technical Skills

Languages: Python, C, UI/UX, SQL (basics)

Tools: Power BI, Excel, Tableau, Databricks (basics)

Concepts: Machine Learning, Deep Learning, Operating System, Database Management, Artificial Intelligence

Education

B.Tech, Computer Science and Business Systems

SA Engineering College, Chennai, Tamil Nadu — Expected 2027 — CGPA: 8.68
